

Today I visited with the highly acclaimed Dr. Michael Oppenheimer, a leading scholar on global climate change. Dr. Oppenheimer recently appeared on the Oprah Winfrey show to detail the effects of global warming on the world.

Today Congressman Ehlers (R-MI), staff from Congressman Boehlert's office (R-NY), and I discussed global solutions to this global issue. The United States should work with new and old trading partners, including China and India, to move towards consensus on cleaner and more efficient energy conservation.
